

Dear Neighbor,

We are pleased to share information about a new underground electric transmission project – **Propel NY Energy** – that will directly benefit you and your community.

### What is Propel NY?

The New York Power Authority (NYPA) and New York Transco – two experienced New York companies – are developing Propel NY, new underground and submarine transmission lines and new substations in parts of Long Island, New York City and Westchester County. Propel NY will bolster the reliability and resiliency of the energy delivery backbone in your community and create paths for clean energy to reach customers. *See enclosed fact sheet with an overview map of preliminary routes.*

### Why is Propel NY needed?

Propel NY will build critical energy connections to improve your community’s long-term safety, security, and quality of life by providing a state-of-the-art power grid that will:

- help **meet current and future demand** as we use more electricity every day to power devices, light, cool and heat homes, and run businesses;
- **reliably and resiliently move power** during blue sky days and the worst of storms;
- **support healthier communities** by moving cleaner power with fewer carbon emissions;
- encourage economic development and **support job and business growth** locally and throughout the state.

### When will Propel NY occur?

We are in the early phases of Propel NY. We are informing local stakeholders and residents about the project and will begin the permitting process later this year. You may see survey crews and our team in local areas supporting the Project. The key permitting process, led by the New York State Public Service Commission, includes environmental, engineering and construction review, as well as regular community outreach to incorporate feedback from area stakeholders like you. After receiving approvals, construction is anticipated to start in 2026. Construction will occur in phases until completion in mid-2030.

We look forward to working with you and keeping you engaged in Propel NY. Regular updates and information will be provided through our website ([www.PropelNYEnergy.com](http://www.PropelNYEnergy.com)) and shared via mail. Please reach out at any time if you have questions.

Thank you,

The Propel NY Energy Team

#### How can I learn more?

- Visit our website [www.PropelNYEnergy.com](http://www.PropelNYEnergy.com)
- Send us an email [info@PropelNYEnergy.com](mailto:info@PropelNYEnergy.com)
- Give us a call 1-800-347-9071

#### Area Open Houses Coming Soon!

We hope you’ll join us at one of our upcoming in-person or virtual open house events to be announced in your area!

We look forward to working together and welcome your thoughts and questions at any time.
